

STARTING WITH CSS ASSIGNMENT

1. Create a simple page with some div tags and show different ways to add css as well as what happens when you target the same elements with inline, internal, and external CSS. Also, utilize comments in the project where required.

Ans. Output Screenshot of:

- 01_index.html
- 02_style.css

01_DIFFERENT_WAYS_TO_ADD_CSS

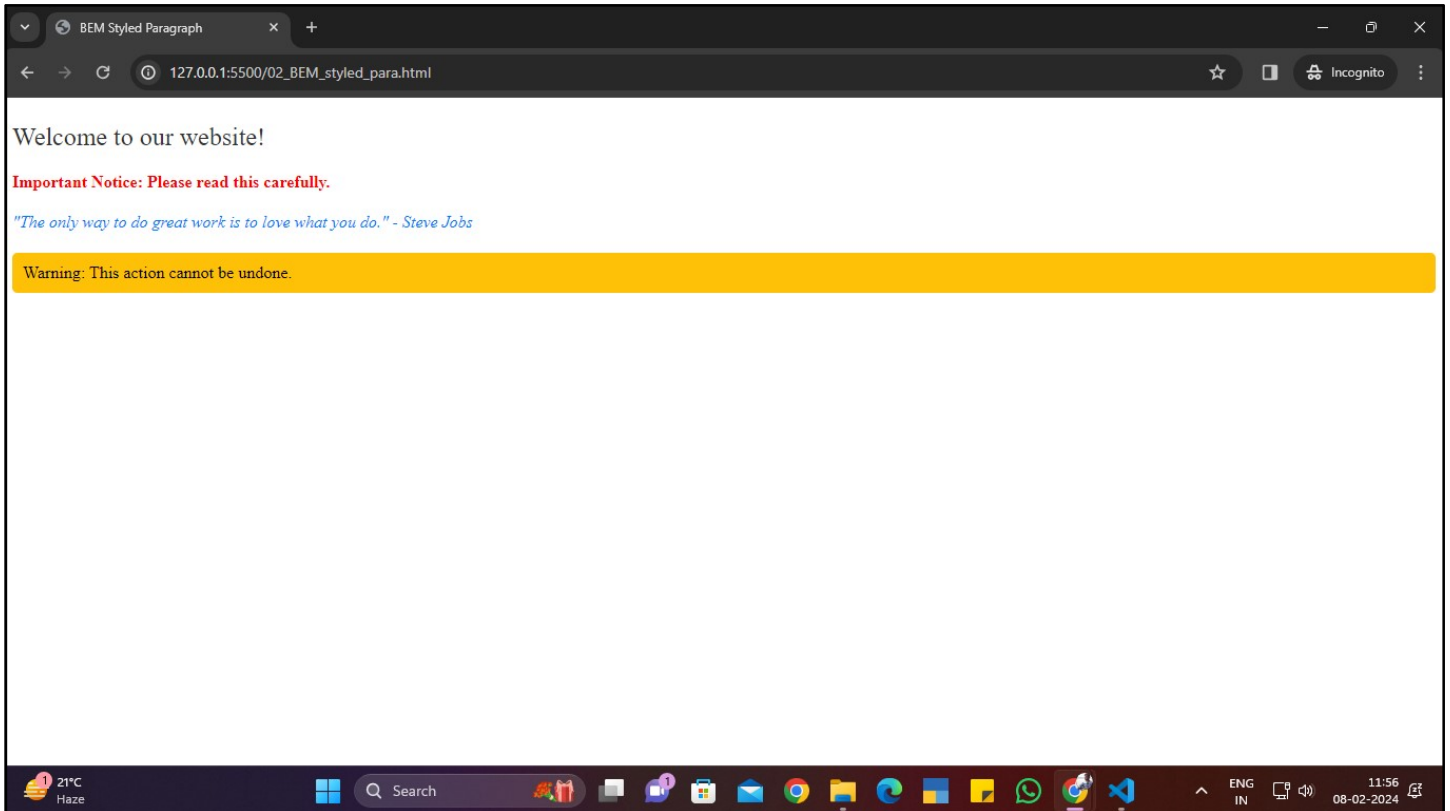

2. Build an HTML Page with multiple paragraphs, each assigned a unique class name. Write CSS rules using class selectors to apply distinct styling to each paragraph. Follow the BEM naming convention and explain how you've named the classes.

Ans: - Output Screenshot of

02_BEM_styled_para.html

02_BEM_STYLED_PARAGRAPH

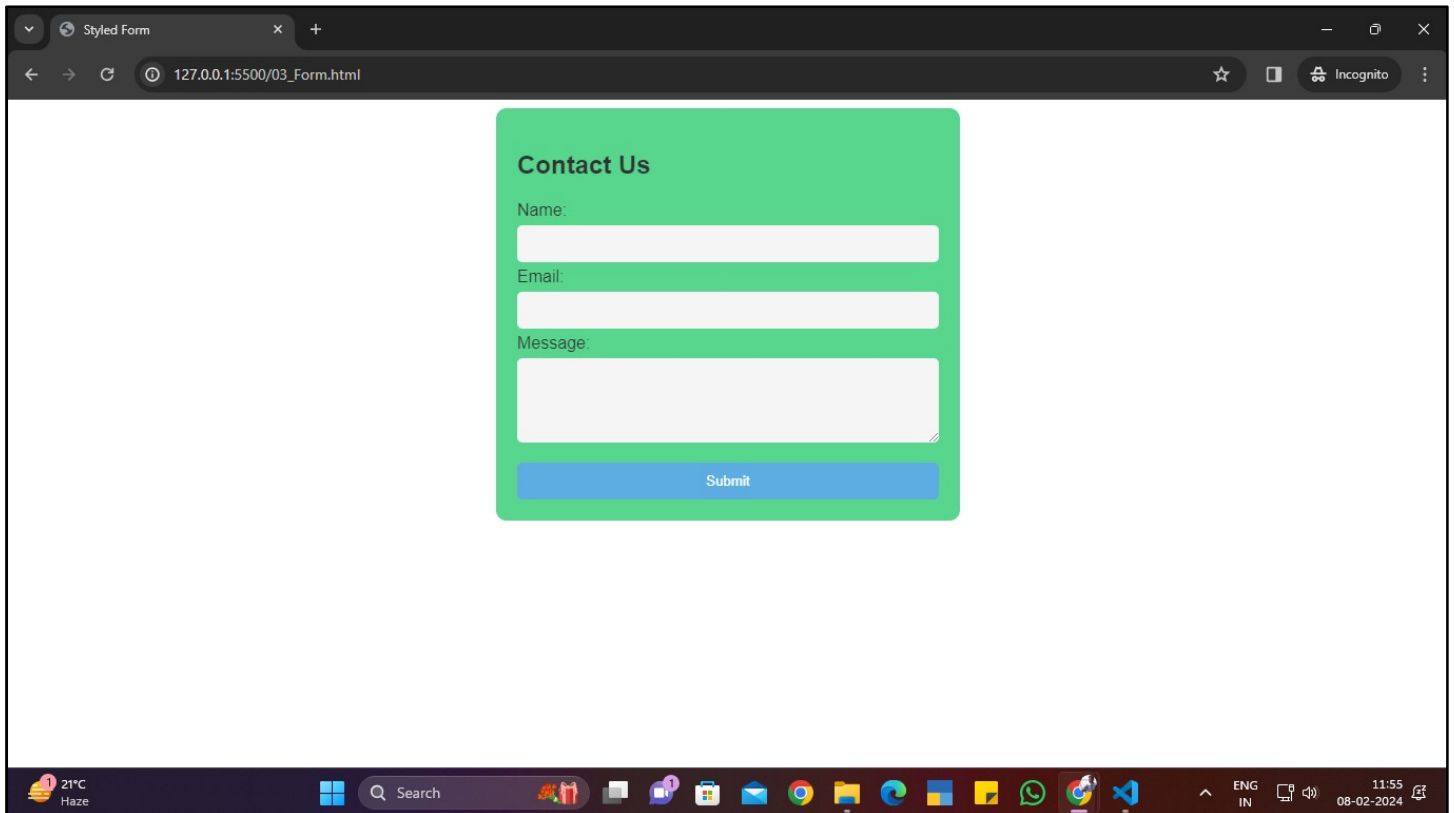

3. Develop an HTML form with various input elements. Use CSS to style the form, including setting backgrounds for input fields. Create a custom color palette for the form elements, and demonstrate how to apply opacity to one of the form sections.

Ans: - Output Screenshot of

02_Form.html

FORM

The screenshot displays a web browser window with a single tab titled 'Styled Form'. The address bar shows the URL '127.0.0.1:5500/03_Form.html'. The browser is in Incognito mode. The main content area features a 'Contact Us' form with a light green background. The form includes three input fields: 'Name:', 'Email:', and 'Message:'. The 'Message:' field is a larger text area. Below the input fields is a blue 'Submit' button. The Windows taskbar is visible at the bottom, showing the time as 11:55 on 08-02-2024.
